11 Troubleshooting 21

Your own list, tasks people share with you, and the optional tools you can use. Team Leaders and managers have their own guides.

01 Getting Started

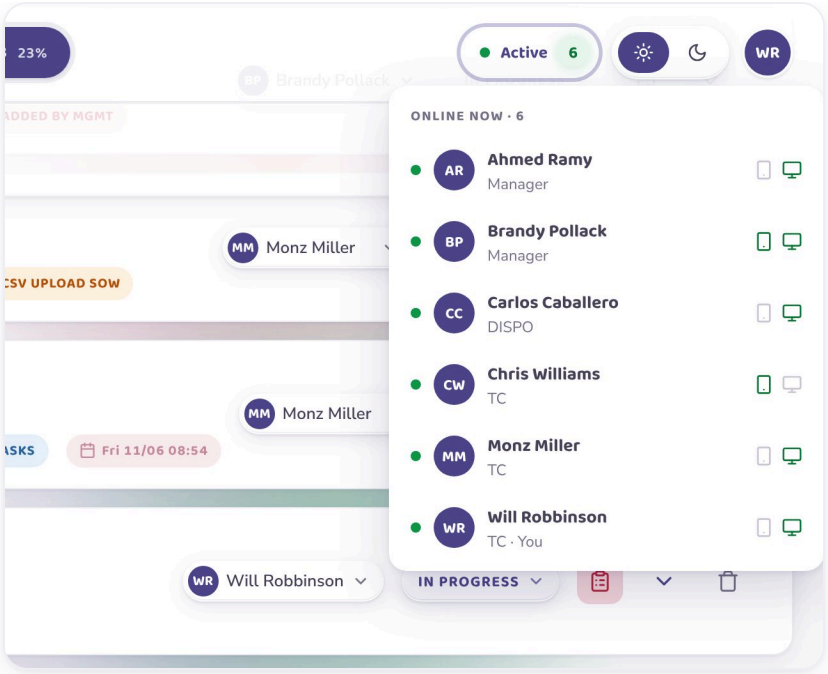

Open **hub.totalchb.com** on a computer or phone and sign in with your work Google account (@totalchb.com or @kpidriver.com).

1. Tap **Sign In With Google** and pick your work account.
2. Your list, **Your Personal Tasks**, opens.
3. The clock beside the logo glows green (**Live**) while every change is saving for the whole team.

The sign-in screen.

Part of the header	What it does
Live clock, beside the logo	Hub time, Eastern. Every date in the hub uses it. Its colour shows whether your changes are saved (see below); click it for the details
TCHB / KPI DRIVER, in the middle	Switch company boards, each with your % done. You only see the companies you have access to
Active pill	How many people are in the hub now. Click it to see who, and whether on phone or desktop
Sun / moon	Light or dark theme; remembered on this device
Your photo or initials	Opens your menu: **My Settings**, **Task Templates**, **Help** and **Sign Out**

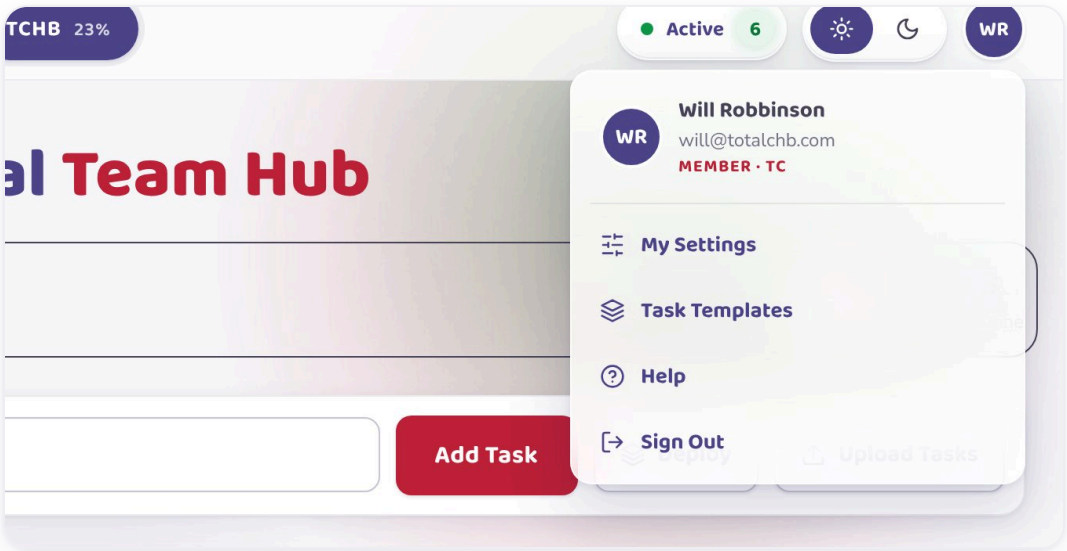

The Active pill, opened: who is in the hub now, on phone or desktop.

The header stays at the top as you scroll, and the tabs line under the title stays just below it.

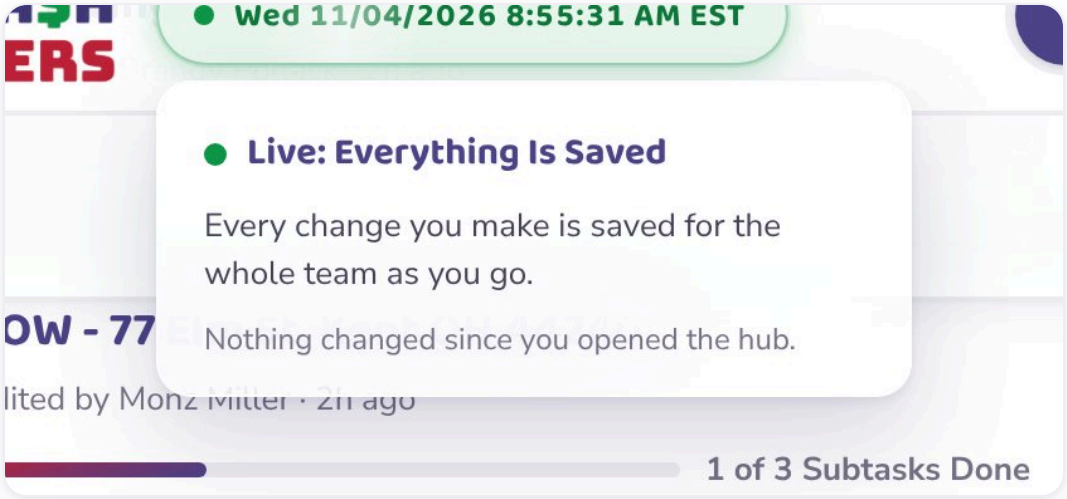

Help, in your photo menu, opens this guide inside the hub at any time.

Open and **Download** at the top of Help give you this guide as a PDF.

Your photo menu: My Settings, Task Templates, Help and Sign Out.

Live clock	Meaning
Green, glowing	Live: connected; every change is saved for everyone
Blue	Saving…: a change is on its way
Red	Not Saved: a change failed. Click the clock: **Retry Now** if it is waiting for a connection, otherwise redo the change
Gray	Local Only: saved on this device only; reload to reconnect

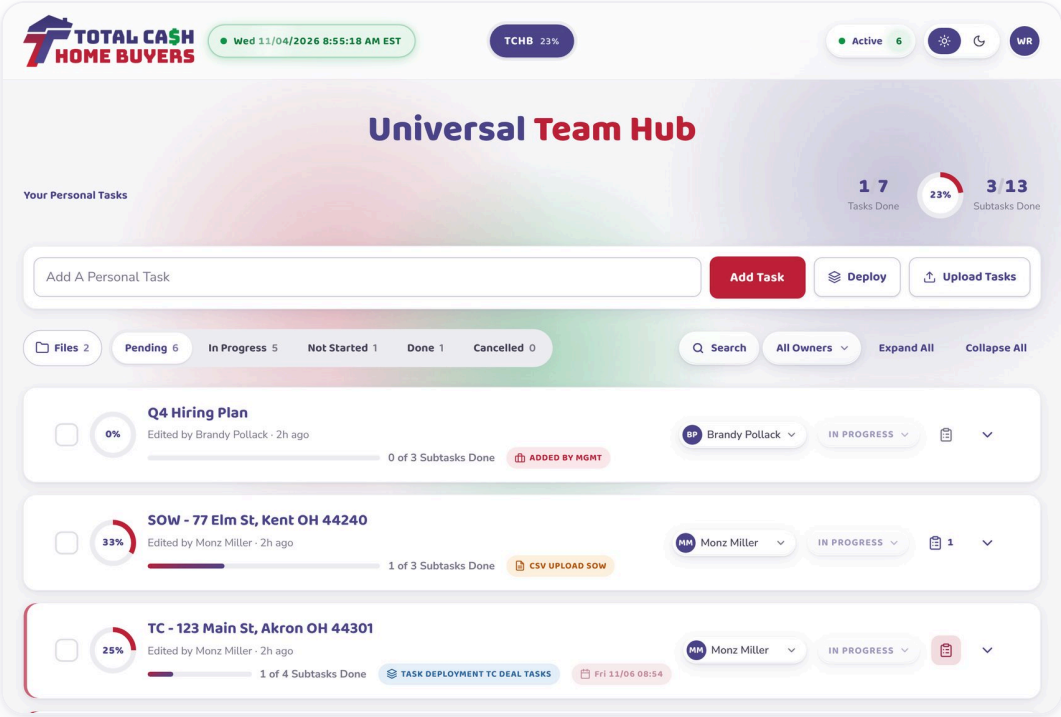

The Live clock, clicked: the save status and when the last change was saved.

Click the clock any time to see when your last change was saved.

02 Your List

Everything you need to do is in **Your Personal Tasks**. You, your Team Leaders and the managers can see it; other members can't.

It holds your own tasks, tasks a Team Leader or manager added for you, and tasks from other lists where you own the task or a subtask. The coloured pill on a task's progress line says where it came from.

A team member's list, on Pending, with tasks shared from MGMT and from a Team Leader.

Each task card reads left to right: the checkbox, a ring with the % of subtasks done, then the title and who edited it last. Under them is the **progress line**: a bar with "1 of 4 Subtasks Done", then the task's pills and due date. On the right are the owner, the status, the **Details** button, the down arrow that opens the subtasks, and the bin.

Pill	Colour	Meaning
(no pill)		Your own task
Shared by *Name*	Green	From someone else's list; you own part of it
Added by MGMT	Red	A managers' task; you own part of it
Added by Title Commitment Agent	Gold	Made by the Title Agent; ticking a blocker here ticks it there too
Task Deployment *Template*	Blue	Made from a task template
CSV Upload *Template*	Orange	Made from a CSV file with Upload Tasks

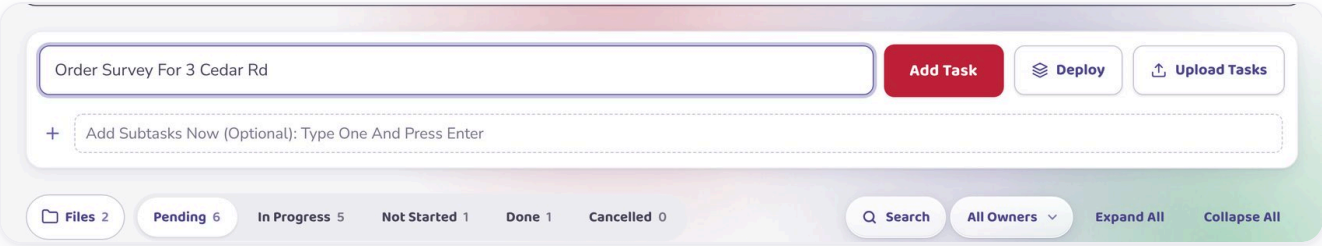

The due date, when set, sits on the same line. It turns redder as the time gets close, and reads **Overdue** once it passes.

03 Working a Task

Add a Task

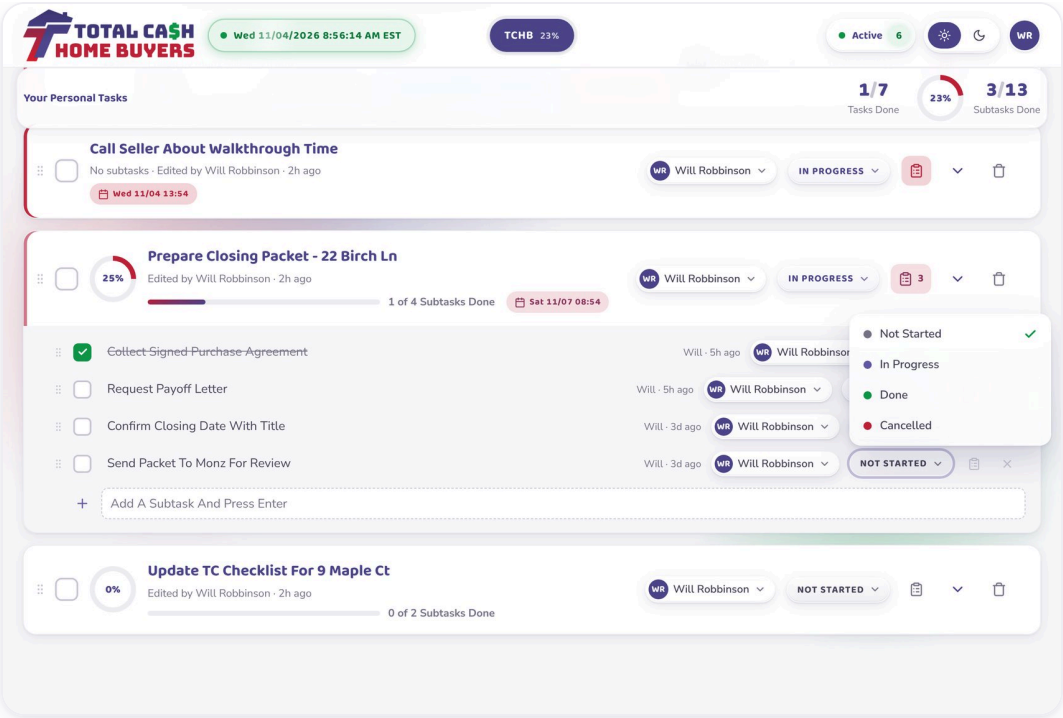

1. Type the task in **Add a personal task**.
2. Optional: list its subtasks right away. A subtask box appears as you type; press Enter after each one. Each subtask has its own owner button.
3. Press **Add Task** (or Enter). The task is yours and joins Not Started.

Status and Ticking

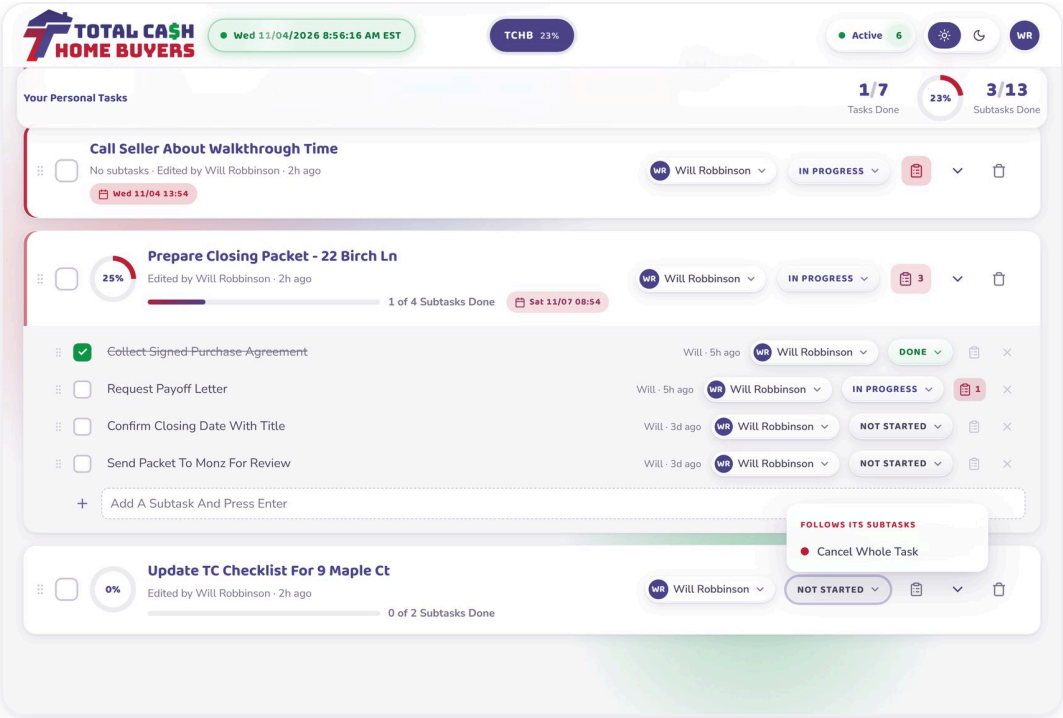

The add bar: type the task, list subtasks under it, then Add Task. Deploy and Upload Tasks sit beside it.

Task	How its status changes
With subtasks	Follows the subtasks: In Progress once one starts, Done when all are done (cancelled ones don't count)
No subtasks	Tap the status pill and pick Not Started, In Progress, Done or Cancelled
Cancelled	A cancelled subtask stops counting and the task stays open. To cancel a whole task, tap its status pill and choose Cancel Whole Task: every subtask is cancelled, and Reopen Task brings them back as they were

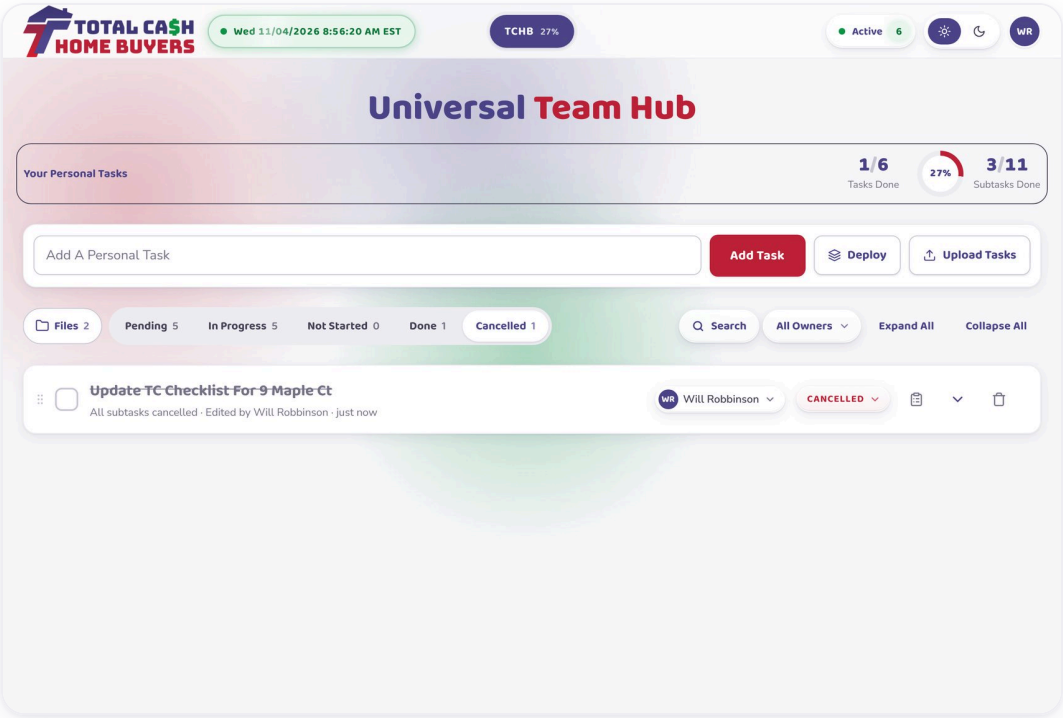

A subtask's status pill: Not Started, In Progress, Done or Cancelled.

- The big checkbox marks the whole task and all its subtasks Done. Unticking sets the done subtasks back to Not Started.
- The list is grouped In Progress, Not Started, then Done. Drag the six-dot handle to reorder within a group (on a phone, press, hold and slide).
- Rename a task or subtask by clicking its title. Changes save as you type.

A task with subtasks: its status pill offers Cancel Whole Task (Reopen Task once cancelled).

Subtasks

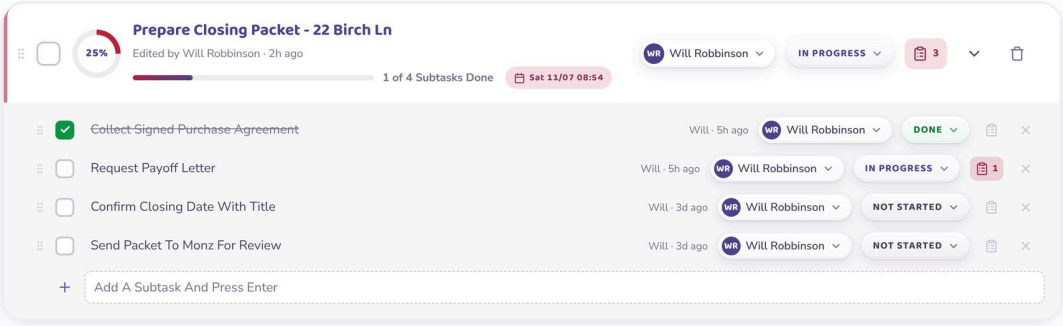

The Cancelled filter: cancelled tasks leave Pending, struck through.

Open a task with its down arrow, then type in **Add a subtask and press Enter**. On each subtask row:

- **Checkbox** sets Done; the **status pill** picks Not Started, In Progress, Done or Cancelled.

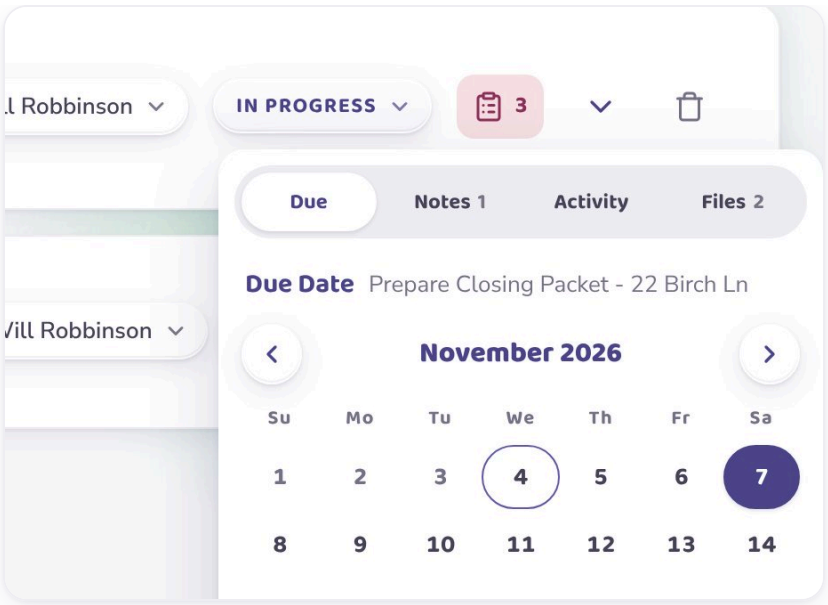

- **Owner pill** gives the subtask to someone. The task then shows in their list as **Shared by** you, and they work only on their own parts.
- **Details** (the clipboard) opens the subtask's due date, notes and files.
- **Six-dot handle** reorders it; **×** removes it (see Deleting).

A task opened: each subtask has its own status, owner and Details button.

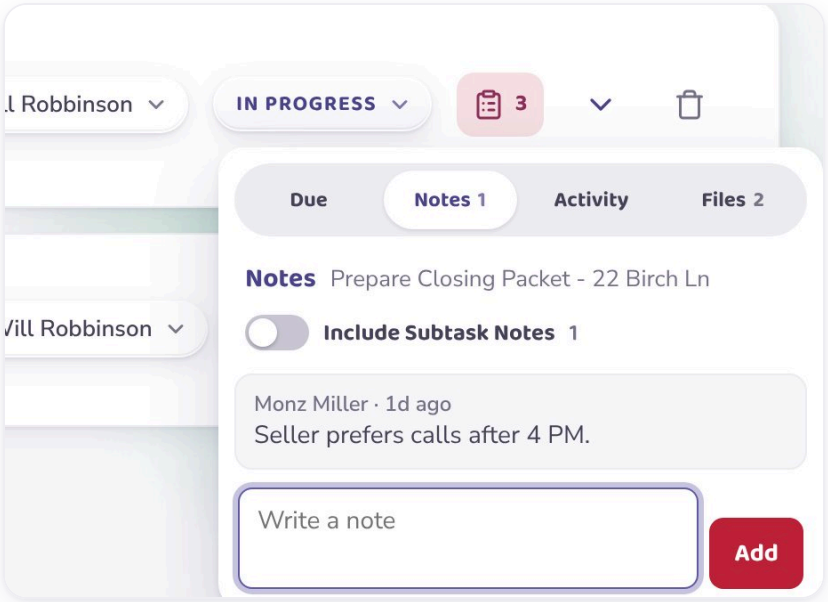

The Buttons on a Task

Button	What it does
Details (clipboard)	One panel for **Due**, **Notes**, **Activity** and **Files**: switch between them with the toggle at its top. It opens on the part you used last. The button shows how many notes and files the task has, and turns red as the due date nears
Due	Pick a day, hour and minutes (Eastern), then **Set Due Date**. **Remove** clears it
Notes	Who wrote each and when. Add with **Add** or Ctrl+Enter. On a task, **Include Subtask Notes** shows its subtasks' notes too
Activity	Every change on the task and its subtasks, who made it and when (tasks only)
Files	Switch between **Upload Files** (up to 25 MB each) and **Add Link** (paste a link, name optional). Everyone who can see the task can open them
Bin	Delete the task (see Deleting)

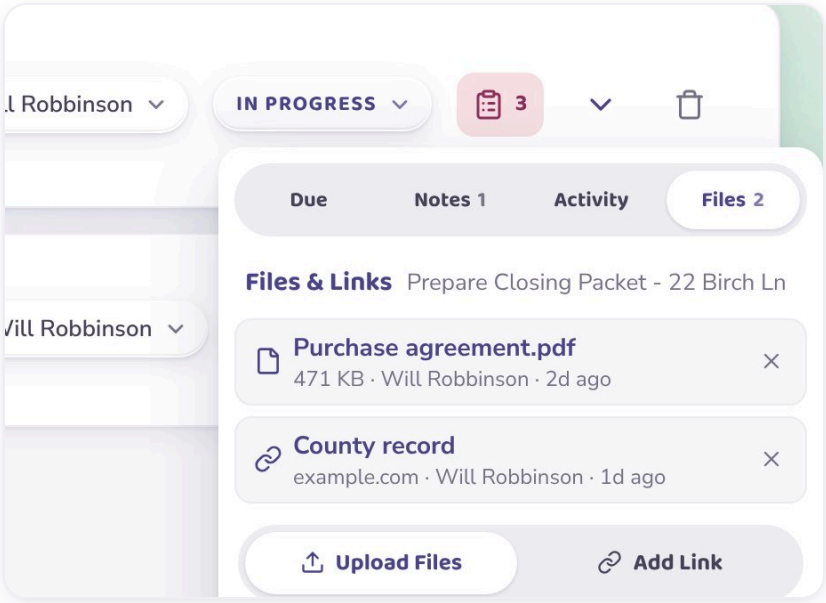

Details on Due: pick the day, then the hour and minutes (Eastern).

Under the title, "Edited by" shows who changed the task last. Hover the line to see when it was created, started, done and due.

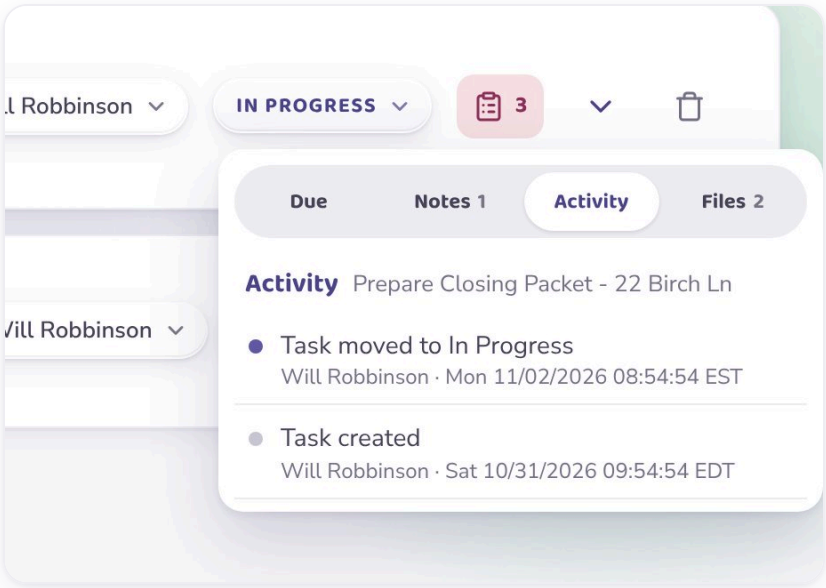

Details on Notes, with who wrote each one and when.

04 Tasks Shared with You

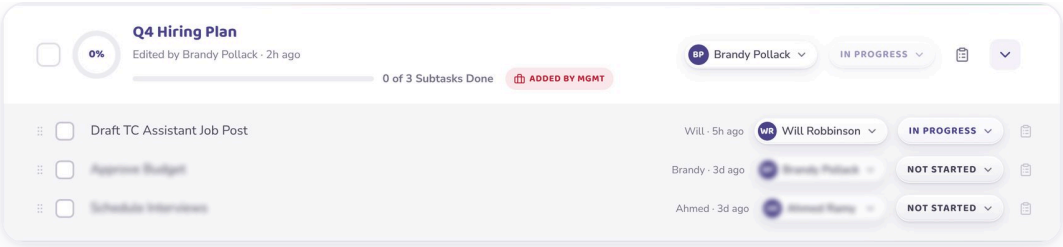

Details on Files: switch between Upload Files and Add Link.

When someone gives you a subtask, or makes you the owner of their task, that task appears in your list marked **Shared by** them (or **Added by MGMT** for a managers' task).

Details on Activity: every change, who made it and when.

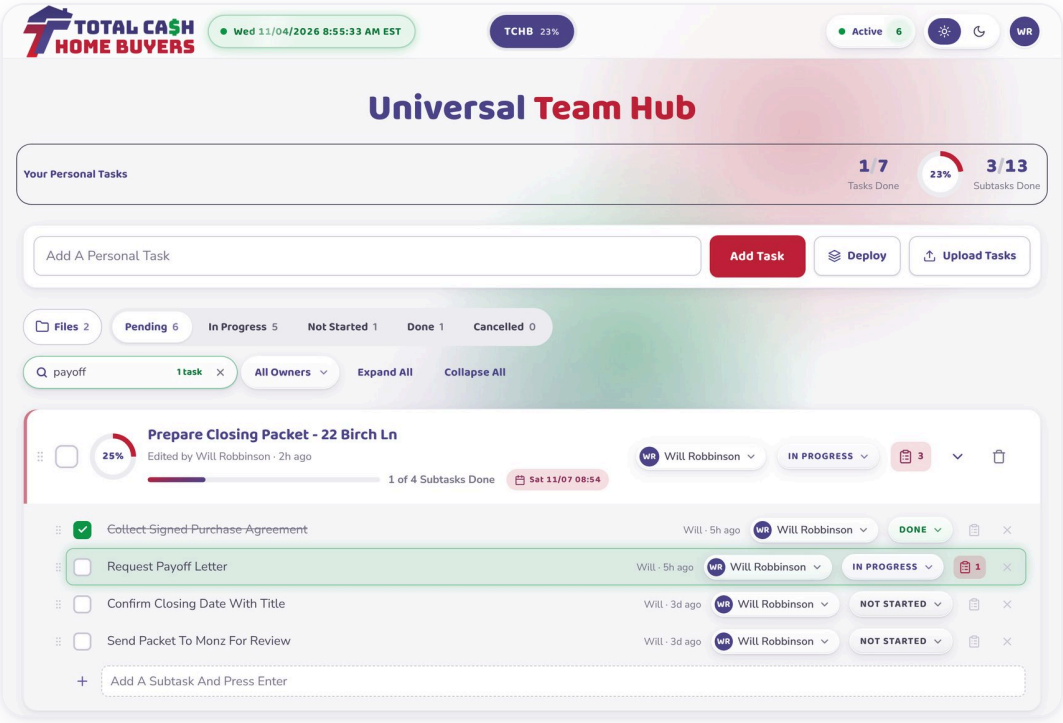

A task shared from MGMT: subtasks owned by others are blurred, but their status shows.

- You see the whole task, so you know how it's going overall.
- Subtasks owned by others are blurred and can't be clicked, but you can still see whether each is Done, In Progress or Not Started.
- Your own subtasks work as normal: tick them, set their status and due date, add notes and files.
- If you own the main task itself, you can work on all of it, including adding subtasks.
- You can't move, delete or reassign these tasks. Ask the person who shared it, your Team Leader or a manager.
- Only the parts you own count toward your % (all of it if you own the task).

05 Finding Things

Tool	What it does
Pending (default)	Not Started and In Progress together
In Progress / Not Started / Done	One status only, each with a count
All Owners	Pick a person: only tasks they own or have a subtask in. Their subtasks glow green
Search	Finds tasks and subtasks whose words start with what you type, in any case ("ai" finds "AI Review", not "Failsafe"). Matches glow green and tasks open to show matching subtasks
Files	**Task Folders**: every file and link on the tasks in this view, one folder per task
Expand All / Collapse All	Open or close every task at once (on a phone, one button does whichever fits)
Cancelled	Cancelled tasks. They leave Pending and don't count toward your %

Search: matching tasks and subtasks glow green.

The filters go back to Pending when you switch company or list. The numbers at the right of the tabs line count tasks fully done, and subtasks done out of all subtasks that count for you; the ring between them is

the % done.

06 Your Department in Team (Optional)

A manager can let you see your whole department's tasks. When they do, a **Team ↔ Personal** toggle appears above the add bar.

- **Team** shows every personal task in your department, labelled with whose it is, plus MGMT tasks your department owns parts of.
- You can open and work on these tasks, leave notes and add files.
- Adding tasks for other people and deleting their tasks stay with Team Leaders and managers.

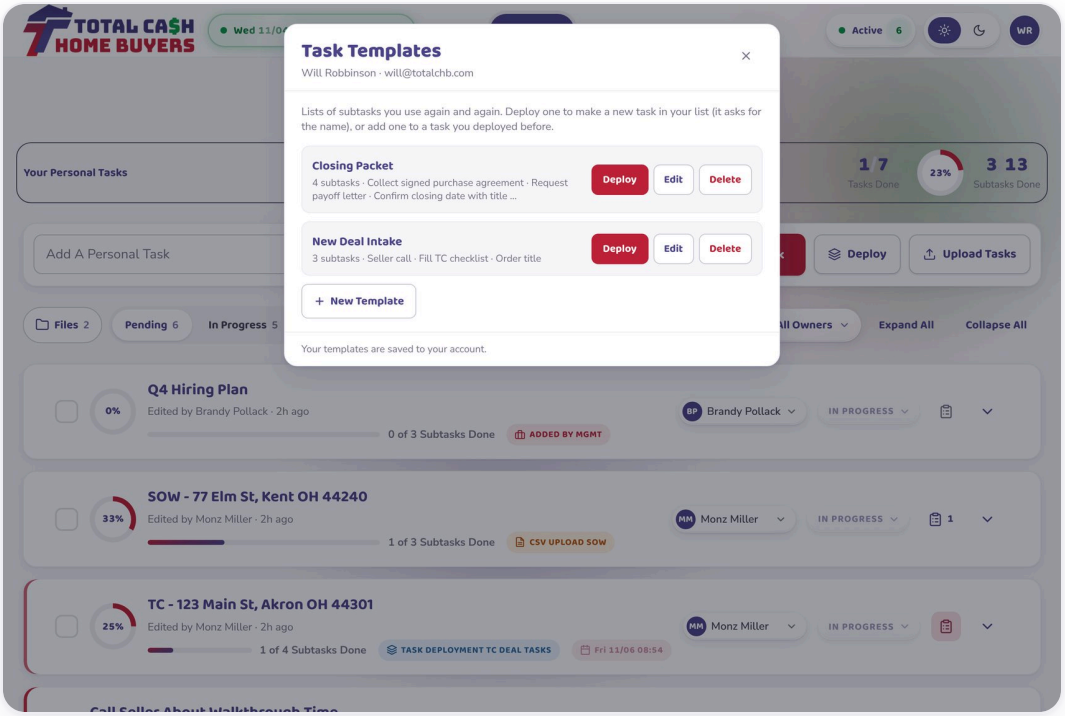

No toggle? Your view is Personal only; ask a manager if you need the department view.

07 Task Templates and Deploy (Optional)

A template is a saved list of subtasks you use again and again. **Deploy** turns one into a new task in your list, named as you like and tagged **Task Deployment** *template name*.

Save a Template

1. Click your photo or initials (top right) and choose **Task Templates**.
2. Press **New Template**.
3. Give it a name and type one subtask per line.
4. Press **Save Template**. Templates are saved to your account, on every device.

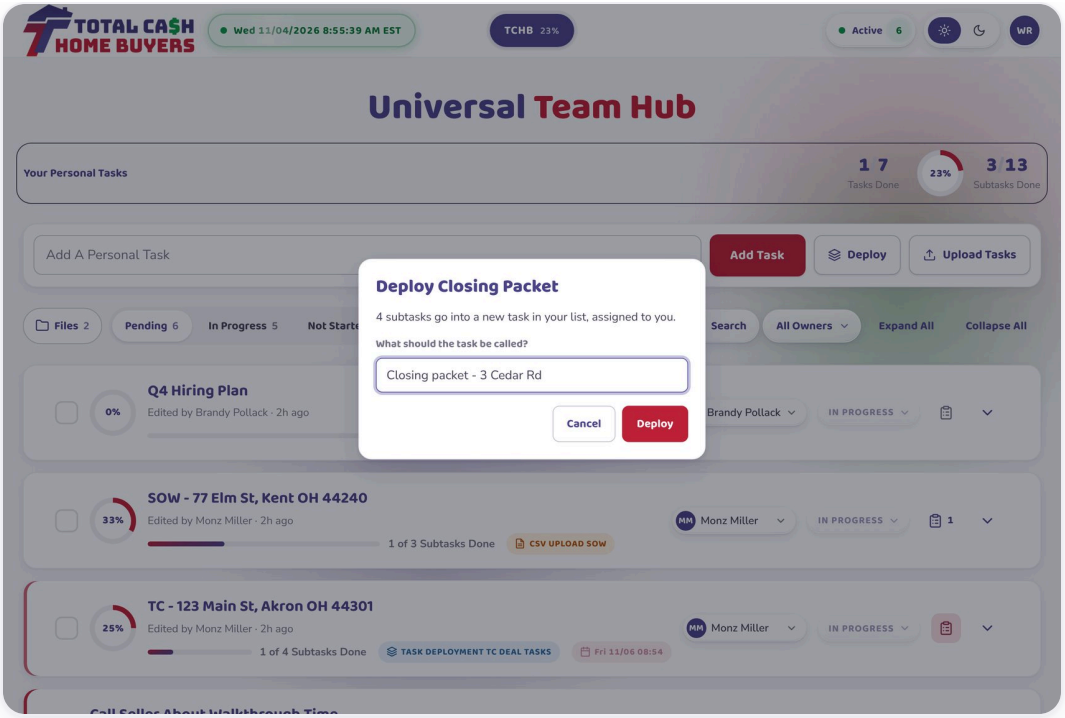

Task Templates: your templates, with Deploy, Edit and Delete.

Edit and **Delete** sit on each template. Deleting a template leaves the tasks already made from it as they are.

Deploy One

1. Press **Deploy** beside Add Task (or **Deploy** on the template in Task Templates) and pick the template.
2. Name the task and press Deploy.

The task lands in your list, open, with every subtask assigned to you. To add more subtasks from another template later, press **Template** on the task's progress line.

Deploy: name the new task; its subtasks come from the template.

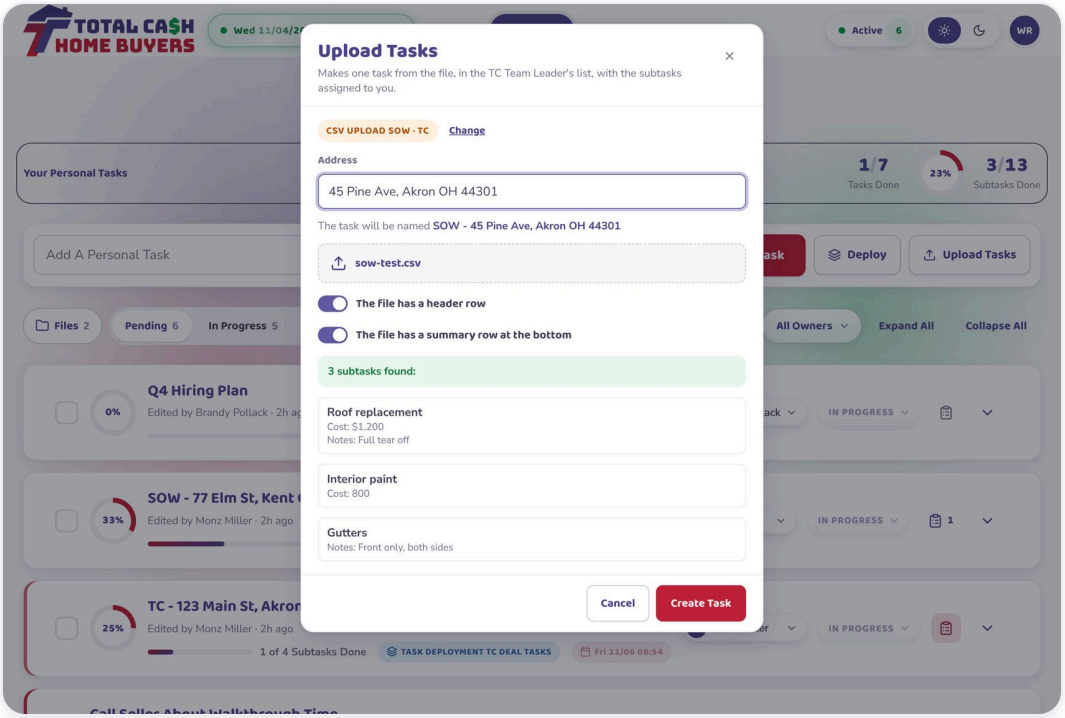

08 Upload Tasks From a CSV (Optional)

Upload Tasks makes one task from a spreadsheet saved as CSV, using your department's upload template. If your department has none yet, the dialog says so.

Template	Department	How the file is read	Task name
SOW	TC	Column A becomes the subtasks; columns B and C become each subtask's note	SOW - *address*

1. Press **Upload Tasks** beside Add Task.
2. Type the property address. The dialog shows the name the task will get.
3. Choose the CSV file.
4. Check the switches **The file has a header row** and **The file has a summary row at the bottom** (both on by default). Those rows are skipped.
5. Look over the preview, then press **Create Task**.

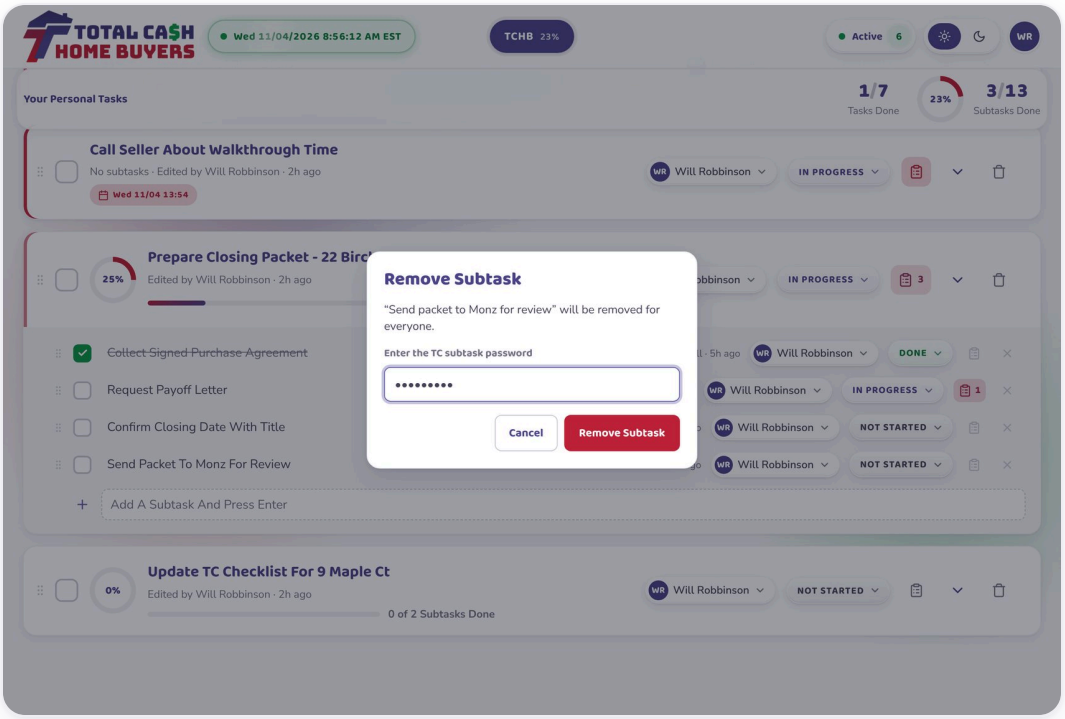

The task goes into your department Team Leader's list, with every subtask assigned to you, so it shows in your list as **Shared by** them. The CSV is kept in the task's Files & Links, and the task is tagged **CSV Upload SOW**.

Upload Tasks with a SOW file: address, file, the two switches and the preview.

09 Deleting Tasks and Removing Subtasks

What	How	Password
Your own task	Bin, then **Undo** for 6 seconds if you change your mind	None
A subtask	× on the row, then type the password and confirm	Your department's **subtask password** (from your Team Leader)
Shared, MGMT or other people's tasks	No bin	Ask your Team Leader or a manager

Removing a subtask asks for your department's subtask password.

A wrong password shows "That password is not right." Try again. The hub keeps a copy of everything deleted, so ask a manager if something went by mistake.

10 Working Offline and on a Phone (Optional)

Working Offline

1. On the sign-in screen, choose **Work Offline In This Browser**. The list starts empty and is saved on this device only.
2. Add tasks, subtasks and notes as usual.
3. Back online, press **Push To Live** on a task. That task, with its subtasks and notes, moves into your list (it signs you in first if needed).

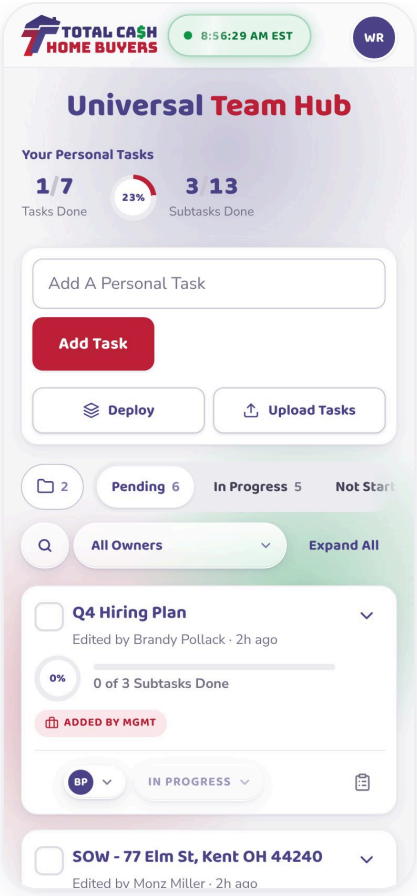

Offline tasks left on the device show under an **Offline** tab until the last one is pushed. **Back To Sign In** returns to the sign-in screen.

> Offline tasks belong to the device, not the person. Anyone using that computer or phone can see and push them.

On a Phone

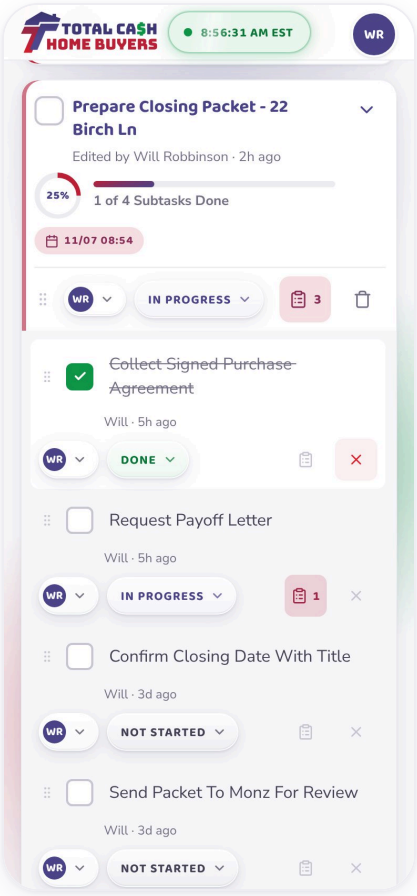

Everything works the same; the layout stacks so nothing is squeezed.

- The header is one row: the logo, the Live clock (time only) and your photo. The company tabs sit under it if you have more than one company.
- **Active** and **Light / Dark** are in your photo menu, with **Who's Online** and its count.
- Each task card has three parts: the title on top; the progress line (ring, bar, pills and due date); and a footer with the owner, status, **Details** and the bin.
- Search, the owner filter, Deploy and Upload Tasks get their own rows. **Expand All** and **Collapse All** are one button.
- Menus, notes and dialogs slide up from the bottom; tap the dimmed area to close.
- Tip: add the hub to your home screen (Safari: Share, Add to Home Screen; Chrome: menu, Add to Home screen).

The hub on a phone.

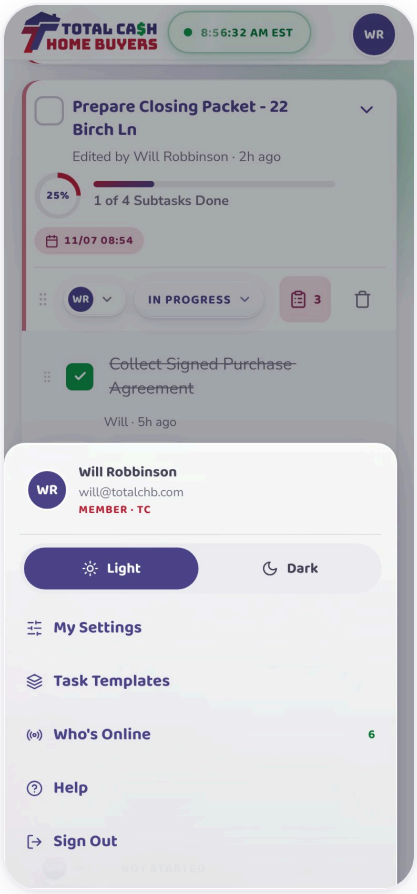

11 Troubleshooting

A task opened on a phone.

Problem	What to do
"... isn't on the team list"	You used a personal Google account. Sign in with your @totalchb.com or @kpidriver.com account
The sign-in window doesn't appear	Allow pop-ups for hub.totalchb.com and try again
I can't click a subtask	It belongs to someone else on a shared task. You can see its status, but only its owner can change it
A task I expected isn't in my list	Check the company tab and the filter (Pending hides Done). Then ask your Team Leader to check the owner
I don't see the KPI DRIVER tab	You don't have access to that company. Ask Remy

Problem	What to do
The clock turns red (Not Saved)	Your last change didn't save. Click the clock for Retry Now, or reload and redo it
My offline tasks aren't on my other device	Offline tasks stay on the device they were made on. Push them from there
The page looks old	Reload: Ctrl+Shift+R on a computer, pull down on a phone

Your photo menu on a phone: Light / Dark and Who's Online live here.
